Subject: Final RCRA Facility Investigation Phase 3 Report for the Former Dow Hanging Rock Site, Ironton, OH EPA ID# OHR 000 157 727 and OHD 039 128 913

Dear Mr. Rudloff,

On behalf of The Dow Chemical Company, Jacobs, is submitting the Final RFI Phase 3 Report for your records.

This document complies data collected in 2017 and 2018 to identify potential source areas, update the Phase 1 and Phase 2 soil and groundwater risk assessments, develop a vapor intrusion risk assessment, and describe the conceptual model for VI potential to nearby structures.

This report has been finalized with the changes incorporated responding to USEPA comments. The changes made are described in the attached *Final Response to USEPA Comments on Draft Phase 3 RCRA Facility Investigation Report for the Former Dow Hanging Rock Site* letter dated August 26, 2019.

Please contact me at (513) 673-2201 and either Mr. Timothy King at (304) 747-3763 or Mr. Jerome Cibrik at (304) 747-7788 should you need anything further.

Sincerely,

Marie W. Chiller, Jacobs
Site Manager
